

Senior RPA Engineer (System)

Land Transport Authority (LTA)

Singapore

Posted on 26-May-21

[Apply Now](#)

Job Description

The Land Transport Authority (LTA) is a statutory board under Ministry of Transport that spearheads land transport developments in Singapore. We are seeking dynamic, energetic, highly motivated, passionate and qualified professionals to join us.

Many opportunities & challenges await those who are keen on an exciting career to realise our commitment to envision & implement an integrated transport system.

You will be responsible for the life cycle management of the RPA platform including the system security and operations. The role requires you to work with a combination of tools including VBA, Python, etc that will support the system administration, system security and governance, operations and maintenance of the platform.

You will support the enterprise RPA deployments, implementation and operations on the Government Commercial Cloud and ensure the delivery guidelines are put in place for the bots integration testing, release management and production support.

You will be leading projects to identify and explore suitable technologies and solutions, as well as designing IT application architectures to meet organizational needs. In your role, you will need to be customer oriented, understand business domain needs and be able to communicate well with different groups of stakeholders.

You will also manage vendor for the associated project and ensure that the vendor meets contractual obligations, conduct UI/UX design, technical requirements analysis, non-functional testing and IT security vulnerabilities assessment leading to successful delivery of the project.

[Apply Now](#)**Requirements: -**

- Tertiary qualification in IT, Engineering or related discipline
- Experience of setting up, managing and maintaining RPA environment
- Strong working knowledge in the usage and functionality of the RPA software preferably UiPath, Automation Anywhere, Blue Prism (Minimum 2- 3 years)
- Knowledge of Python, SQL, VBA and PowerShell scripting
- Knowledge of Public Clouds, Systems Security, WebApp & SQL Server, Active Directory, CyberArk and DevOps will be a plus
- Robotics Process Automation (RPA) experience (strategy, deployment, maintenance production support)
- Strong analytical, communication, leadership and presentation
- Ability to work collaboratively in a cross functional team
- Strong facilitation and executive communication (written & verbal) skills required

and sustainable to meet the nation's needs. We manage the construction of new Rapid Transit System (RTS) projects, as well as upgrading of existing rail lines. Besides RTS projects, we also enhance the road network and provide motorist with a greater choice of travel routes by carrying out projects to widen, upgrade and build new roads. In addition, we manage and maintain road structures and facilities so that they are operational at all times. Besides land transport infrastructural development, LTA also covers regulatory and maintenance functions and you can look forward to a good range of exposure and opportunities within LTA.
